When you use a reference and proportional places, you can instantly position and place a part in any dimension without having to enter multiple, redundant dimensions. (video: 1:50 min.) Revive your drawings and share work with improved proportional places, which show you the relationship of the part to your reference and are easy to use. (video: 2:04 min.) Apply fills to patterns and more. Using fill styles lets you specify a color for the interior of a pattern, the outer edge, and the outer fringe. Apply fills to surfaces and add fills to patterns, and to right-click on a group of objects, choose the Fill tool, and click inside the group to apply the fill. (video: 1:48 min.)
