ObjectARX (not to be confused with ARX) is an API and development toolkit for AutoCAD. Category:AutoLISP Category:C++ software Category:.NET programming language familyShare this story Story Photos Clayton, UT – April 8, 2014 – Here at Pelican Bay Aquatic Center in Clayton, Utah, Hunter Thacker is eyeing the finish line of the 2014 National High School Triathlon Championships. The prep swimmer already has a new-found appreciation for physical activity, and he says it is thanks to a new friend who is as passionate as he is about getting into shape. A little over a year ago Hunter was a nut in the race for success. Now, thanks to the combination of PBA's Ultimate Athlete Camp and personal coaching by Mary Anderson, the St. George junior is in first place. "My sister recommended this camp to me because she thought it would be a good way for me to come in as a swimmer and get better at swimming," Hunter said. "After the first day, I fell in love with it. I started coming to the workout sessions and swimming. I really enjoyed it. I didn't know much about swimming before, but now I know a lot about it." The eight-week camp consists of two hours of pool time and two hours of weightlifting, running, gymnastics and tumbling per week. One of the greatest aspects of the camp is the time spent one-on-one with instructors and athletes. "We have a great staff here," Anderson said. "They take care of every athlete, and we get to know each of them. It is so cool because we do this all the time, and each kid brings in something different. We get to know each of their strengths and weaknesses. Then, they teach us how to work with them. We don't just teach athletes how to swim, but we teach them how to swim better, and how to be a better athlete." Hunter's improved swimming has led him to victories in a pair of meets. After finishing fourth in the state meet in the 100 yard freestyle this past weekend, Hunter is hopeful that the same will come true in the Triathlon National Championship. "I really want to win that race this year because it would mean a lot for me, a1d647c40b

HEARTBREAK: The Greatest Hits Volume 3 UK hard rock legends HEARTBREAK recently released their debut album "Beat You Down" (May 12, 2012). If the band's success with "Beat You Down" was a prelude to what's to come, then fans can look forward to this collection of classic HEARTBREAK songs. "Beat You Down" is primarily a collection of songs originally featured on the "Electric Chair" (1987) and "Broken Wings" (1991) albums. With the exception of "Love Kills", which came off "Broken Wings" and was re-recorded for "Beat You Down", the rest of the songs have been newly recorded for this compilation. "All I Want Is Love", "Give It Away", "Rock 'N' Roll", "Who Will Stand in My Way" and "Too Much Soul" are all rocking anthems that are sure to bring crowds to their feet. The title track, "Heartbreak", is a huge anthemic ballad, which is quite fitting considering the band's struggles during the recording sessions for the album. "That's What Love Will Do" is a great choice to close out the disc, as it is a brand new version of the classic HEARTBREAK song that never made the album version. The best part of this collection is the limited edition poster that is included with it, as well as the booklet that is packed with band history and photos. This is one of the best package offerings that I've ever seen from any band! The only real problem with the compilation is that it contains five tracks in which
