Dapsone has been used for decades in the treatment of inflammatory bowel disease. This review summarizes the newest developments and provides an update of the efficacy and safety of dapsone. Meta-analyses of clinical trials on the use of dapsone in ulcerative colitis (UC) have concluded that dapsone is more effective than placebo or mesalazine, although its efficacy has fallen behind that of cyclosporine. One trial on erythromycin in UC reported that the addition of dapsone to erythromycin was superior to the use of erythromycin alone, but its efficacy was not superior to that of cyclosporine. The randomized, double-blind, multicenter study on UC in children found that dapsone was no more effective than mesalazine. In Crohn's disease (CD), two meta-analyses showed that dapsone was more effective than placebo, although its efficacy was not superior to that of immunosuppressants. The available data on its efficacy in CD are limited, and the decision to use dapsone for CD should be made on an individual basis. In CD, the safety of dapsone has been established by a randomized controlled trial. The side effects of dapsone are mild and rarely cause discontinuation of the therapy. There is some evidence for the beneficial effect of dapsone on steroid-resistant inflammatory bowel disease, but further studies are needed.Delivery of a time-varying plasma-derived coagulation factor concentrates by albumin dialysis: a prospective, randomized study. Plasma-derived coagulation factor concentrates are now available with a new approach to manufacture in which the factor is concentrated and purified in a purified albumin-dextrose solution. This albumin solution is then mixed with fresh, non-heat-treated plasma and processed to concentrate the factor. There are no published data on the safety or efficacy of this concentrates-containing albumin. To compare the safety and efficacy of the new albumin-containing factor concentrates (Factor VIII [FVIII], Factor IX [FIX], Factor X [FX], and FVIII + FX [FVIII/FX]) with those of the traditional
