How can I achieve this? A: There is no inbuilt calendar control for Dynamics 365 Online, but if you were using Dynamics 365 On-Premises then you could use the CRM Reporting Engine and there is a "Calendar" report that you can use. You can find this report under the Reports section of the Dynamics 365 Admin Portal and it shows the list of events for a given date range. SQL Server Migration Assistant for Oracle is a very useful application for database migration. With this specific program, you can easily migrate and synchronize a number of database objects, including tables, indexes, schemas, databases, and so forth. This specific application is a general-purpose instrument that supports many database objects, such as tables, views, stored procedures, triggers, and so on. With it, you can easily migrate an Oracle database to a SQL Server database, or create a SQL Server-based schema, right from an Oracle database. This utility is essential for migration of data, since it offers you the ability to compare and synchronize Oracle and SQL Server databases. Moreover, the tool supports SQL Server editions that were formerly released (with SP3, SP4, SP5, SP6, and SP7). After you make the migration, you can create a script that, when executed, can easily retrieve the migration content from the newly synchronized database to an existing or new destination SQL Server database. This tool is easily compatible with the most popular Microsoft Windows OS, and can run on both 32-bit and 64-bit platforms.
