HelpScribble PC/Windows

GetHelpScribbles is a software program which can be used in order to create help contents for your Windows apps, regardless of the development tool you have used. The installation processes is typical and brings you to a plain interface. It encompasses a menu bar, several shortcut buttons and a panel to display your project. All user categories can take advantage of it, regardless of their level of experience. This utility enables you to export the help contents you have created to the hard drive, in formats such as HSC, TXT, HTML, RTF, HLP and CHM. Importing is possible from HPJ and RTF files, yet it warns you that a decompiler might help you achieve better results.

You can merge two projects, view options, use a spell checker, undo or redo actions, cut, copy and paste elements, as well as modify topic properties, such as ID, context string, title, keywords, status and add a macro.

HelpScribbles lets you change the font type, style, size and color, align text, use a find and replace function, and insert bullet points, images (PNG, GIF, JPG), Flash files (SWF), buttons linked to a topic, target or WinHelp macros, as well as RTF codes and HTML tags. The program also integrates browse sequence, contents file, index, SHG and WinHelp macros editors, which can aid in creating thorough user guides, and enables you to print all your data. Minimal CPU and memory are required, which means you can easily open other tools in the same time, without it affecting the way your computer runs. Taking all of this into consideration, we can safely say HelpScribbles is a useful piece of software for creating Windows Help files. It presents a user-friendly and feature-rich environment, good response time and comprehensive Help contents. HelpScribble Description: Keywords:

HelpScribble is a software program which can be used in order to create help contents for your Windows apps, regardless of the development tool you have used. What's New in the HelpScribble?

Find and Replace - Search your project for any words that you want to change, and the program will do the rest! Remove Spurious Newlines and/or Indentation - Remove all those newlines that appear after empty lines and brackets, and any spurious indentation. Easily removes them from your text. Split a multiline Text - Split your long, multiline Text. Easily break it into several lines, and keep a copy of your source Text in a new Text window. The program supports lines spanning multiple Text windows, if that's what you prefer. Replace Word/String - Find the selected word in your Text or Replace it with a new one. Also remove the selected string from your Text. Merge Multiple Text Files - Merge several Text files into one big one. Simply select the files you want to add and paste them together. Just make sure to select the Text as "Type" "Multi-file Text". Cut/Copy/Paste Text - Copy your Text, including some or all of its formatting, or select a section and copy just the part you want to paste. Build a Compilation Chain - Create your own Compilation Chain for compiling C/C++/ASM source code. It supports automatic preprocessor and compiler variables, which make it extremely simple to create a compilation chain, where you can customize compilation flags and some compile settings. Uninstallation HelpScribbles includes a Wizard that guides you through the process of uninstalling the program. The wizard will help you remove all the program's files from your computer, as well as uninstall program itself. HelpScribbles Help Files This application is designed to help you create a user-friendly, attractive, searchable, and well-structured Windows Help file. If you have been working with the Microsoft Windows operating system since the very first days of DOS, you will know that Help contents were designed to help the new users get to the commands and functions they were looking for. HelpScribbles is intended to give the experienced users a way to quickly make their old Help files more user-friendly, attractive, and searchable. HelpScribbles allows you to create a table of contents (TOC) for your Help file. It is also possible to have the tool automatically generate a table of contents for your Help file. The resulting contents are highly customizable, and you can even add the TOC and additional content pages manually. The program's functionality can be compared to the common Windows Help viewer, such as Help & Support Center, Windows Support Center, Microsoft Knowledge Base, and many others. Unlike most Help viewers, HelpScribbles enables you to create, edit, view, print, and even export any contents. The following chapters provide instructions and information regarding how to use and benefit from HelpScribbles. HelpScribbles is
