
NxFilter-Cloud Crack Activation Code With Keygen [32|64bit] [Latest 2022]

NxFilter-Cloud is a comprehensive and reliable software solution that was developed to provide cloud businesses with a mixed-method of DNS filtering and local proxy filtering, enabling customers to monitor the Internet activity occurring in their network by means of a browser-based graphical user interface. Practical and intuitive usage The program features a fairly simple and straightforward setup process, but bear in mind that it resorts to a browser-based interface, meaning you need to have a web browser

installed on your system in order to work with NxFilter-Cloud. Once complete, you can run the application from the created shortcut or you can input the default URL ‘ into the address bar, then enter the default ‘admin / admin’ credentials. In terms of privileges, the admin holds the highest position, as he can create operator accounts; in their turn, operators can create user accounts, even create and manage individual policies. Swiftly configure and manage your own cloud web-filters NxFilter-Cloud informs you of the traffic and block trends for the monitored

network in two distinct graphs, while by accessing the various sections at the top of the window ('Config', 'Operator', 'Category', 'Whitelist', 'Logging'), you can define the functioning preferences for your application. The 'Operator' tab enables you to add new operators to your list and edit their username and password, policy, whitelisted domains and free-time intervals. From the 'Whitelist' section, you can allow access to certain domains or keywords. The 'Config' component of NxFilter-Cloud lets you determine the administrator name and password, the email alert settings and

the allowed IP addresses. Similarly, you can run backup operations for the current configuration or you can deal with redirections. You also have the possibility of blocking a certain page and display a preferred message whenever it is accessed. Moreover, NxFILTER-Cloud offers Active Directory integration over the cloud, Dynamic IP updater, as well as the possibility to rebrand and customize the user interface, from the '/nxfilter/webapps' section, so it can fully meet your requirements. NxFILTER-Cloud: The Leading VPN, VPN Proxy and NpCap Proxy Provider

Multiplexer Easy Software, Inc. offers the NxFilter-Cloud program to its customers, allowing them to create their own operators in

NxFilter-Cloud Crack + For PC

Practical and intuitive usage Swiftly configure and manage your own cloud web-filters Reliable cloud-based web filtering tool Wide selection of settings and customization options Installers NxFilter-Cloud Product Key has been developed with the most advanced technology to ensure that it is the most modern filtering solution available. In addition, to support and expand the

functionality of this innovative solution, we have developed additional modules for this application. For your convenience, NxFilter-Cloud has been distributed through numerous file installers, including: Total-Cost-Benefit You save a lot of money when you are selecting an effective web filtering tool. It is due to the fact that you save money on equipment, software license fees, installation and service costs. NxFilter-Cloud Features The web application has been created using the most advanced technologies which makes NxFilter-Cloud the most advanced web filtering solution

available. Web Interface A browser-based interface and, if you use Windows, an excellent program that you can use without having to install or upgrade to a newer version of a browser. Multilingual The interface of NxFilter-Cloud is multilingual and this Application is the most modern filtering solution available. Updated The application has been developed to ensure it is the most advanced filtering solution available. Multi-Domain The application has been developed to ensure it is the most advanced filtering solution available. 1 domains The application has been developed to

ensure it is the most advanced filtering solution available. 5 domains The application has been developed to ensure it is the most advanced filtering solution available. Unlimited domains The application has been developed to ensure it is the most advanced filtering solution available. Local-Proxy Server A proxy server that is used in work and home to redirect data online through your own local network connection. Cross-Platform The application has been developed to ensure it is the most advanced filtering solution available. Free The application has been developed to

ensure it is the most advanced filtering solution available. Paid The application has been developed to ensure it is the most advanced filtering solution available. NxFilter-Cloud is a cloud-based web filtering software for both Windows and Linux which is capable of filtering the online activity of your entire network. The software provides web filtering on both the local and cloud level, and it provides you with the ability to configure, deploy and manage the filtering of individual connections and the overall connection processes in an extremely efficient and proficient manner. Features Easy to implement, easy to use The program is designed to be used by even the most

inexperienced administrators to set up the filters for entire web connections and on-site user accounts. It is not necessary to have any advanced knowledge about networks or web filtering software, as the interface makes everything transparent for you. In addition, you can easily remove specific and specific categories of activities or set preferences to manage sensitive online information.

Comprehensive filtering The application manages all of the web activity in your PC, and it also supports a cloud-based aspect by means of which you can filter the

Internet connections of users from all over the world. Moreover, the program enables you to filter the Internet traffic entering your PC or leaving the network. All of these features can be deployed in order to screen and filter the online activity in your network.

Safe and sensible The application features a simple password-protected GUI that lets you configure the filters yourself, and that means you can specify the parameters you want to use, without having to employ any technical experience or special software. Furthermore, the program is completely safe and secure, since it

only allows connections which are authorized by your account and no traffic or materials will ever be stored.

Quality and reliability The software is developed in Java, which is by now one of the most powerful development and programming tools around.

Thanks to the program, you can configure the filtering of your entire local network, which is extremely convenient when dealing with all the Internet activity taking place in your neighborhood. It will also create customizable operators who can be used to set and apply their own configurations, as long as they have the

appropriate credentials. Type of Scan and Scan Options: When you are using an Internet service for the first time, you can review the last 9 months of activity and can see the number of different sites visited by each user. With this feature, you will have the knowledge you need to distinguish a suitable web browser from an unsuitable one. For instance, you can easily know whether it is worth installing an additional software when you need a VPN for the first time, or whether it

What's New In?

NxFILTER-Cloud is a next generation web proxy and web filtering application that helps you monitor and control Internet activities occurring on your network. NxFILTER-Cloud works as a proxy server, which will proxy all Internet traffic to any other devices within your network. If a device on your network cannot connect to the Internet, NxFILTER-Cloud will filter out most traffic such as email, online banking and online shopping and display the monitored Internet traffic in the form of a web user interface on your desktop. NxFILTER-Cloud is a commercial proxy service. Because of

its free 24/7 customer support, free daily update (included), multi interface- the graph and able to filter websites by category. The software is updated every day to ensure it is the most up-to-date version, to provide the most accurate monitoring and filtering capabilities. NxFilter-Cloud has many features you can control through the user interface. This includes domains, IP-addresses, locations, DNS queries, user accounts, backup, IP address blocking, Whitelisting, etc. The following list is an incomplete overview of the main features: * Web Filtering - Spy websites using

categories like "adult", "pornography", "video", and more. * Dynamic IPs - Update the IP address list of your IPs to filter the websites that can be visited within a network. * DNS Proxy - Setting the DNS server to always point to NxFilter-Cloud instead of the default DNS server. * DNS Leaks - Test any given DNS queries to see if they have leaked. * Pooling - Allows for a larger IP (one IP entry is more than enough on smaller devices) to be shared through multiple computers. * IP address blocking - Block the address of any IPs specified. * User Accounts - Login to your account with

the admin account and login with the public account. * User management - Create, update, delete accounts and their permissions (toggle/block) and DNS accounts (if NxFilter-Cloud is set as the DNS server). * Domain Whitelisting - Allow access to whitelisted domains for your accounts. * Backup - Allows NxFilter-Cloud to backup and restore its XML files each night. * Settings - Control most aspects of the software through these settings. * Web UIs - Use a wide range of Web UIs to customize the look and feel of NxFilter-Cloud. * Sniff
