SlackJack Description: SlackJack is a simple and free network security solution. It is a powerful monitoring tool to monitor and check your network activity in real time. Network Security Monitoring Automated network analysis and proactive alerting SlackJack uses IntelliSensor, which is a simple, free and efficient Intrusion Detection System. IntelliSensor will notify you when it detects an attack on your network. The application comes integrated with an advanced automated system that can monitor your network activity in real time. SlackJack will use IntelliSensor to make a continuous analysis of your network activity, and will alert you when it detects suspicious activity. Numerous Reporting Options SlackJack includes a variety of reporting functions. This ensures that you will have the possibility to easily track all your network activity. The application includes reports such as count of packets, count of computers and hosts, and more. Automatic virus signature updates SlackJack is continually updated with the most current virus signature information available. This ensures that you will have a full view of your computer's network activity. The application includes the IntelliSensor virus scanner and anti-spyware scanner, which ensures that you will have a full view of your computer's network activity. More than often users find themselves in the situation where they discover that one or more of the files that they need for work have been accidentally deleted or that they are lost, something that could become an issue 77a5ca646e

PerfectFileRecovery Download [Latest]

Restore the files and folders from a saved image. Can be used in cases when the system crashes and lost the files from last session. Directory Exchanger is a file exchange software that allows users to automatically exchange files between two different directories or remote server. The software supports both FTP and HTTP protocol for data transfer. Directory Exchanger can transfer files in both directions (download from server and upload to the server) at the same time. In addition to file exchange, the software also enables users to split files, convert files, and remove password protection. Shredder is a utility to permanently erase files, folders, and whole disk partitions, and make the files totally unrecoverable. The program supports the FAT12/16/32/FAT32 file systems, HPFS/NTFS/exFAT file systems, Linux native ext2/ext3/ext4 and HFS/HFS+ file systems. Shredder can shred both whole drives and their partitions. Shredder is very fast and extremely secure. Shredder is a special tool for advanced users, since it is not suitable for non-technical users. But if you need it, Shredder is a reliable option. The Shredder (Disk Shredder) is a specialized utility that permanently and irreversibly removes files, folders, and whole disk partitions. It can shred both entire drives and their partitions and shreds individual files, folders, and whole disk partitions. The Shredder is not suitable for normal users, since it can permanently erase the files, folders, and partitions. Shredder can shred either the whole disk, its partition, or a file or folder. The process starts as soon as the Shredder is started. You can select a process (file shredding, folder shredding, or whole drive/partition shredding). You can add information about the files and folders. File Shredder is a simple and reliable tool to permanently erase files and folders, and make them totally unrecoverable. This Shredder can be run with the silent mode, so that it doesn't disturb you. It supports all the modern operating systems such as Windows, DOS, Linux, Windows Phone, and Android. With DiskWipe++ you can securely wipe any hard drive, external hard drive, memory card or other storage medium. It is an advanced software that is also able to remove all data traces and marks. DiskWipe++ is

What's New in the?
