POSTS INTRODUCTION DROIT DE FER, the third and last chapter of his book on the science and civilization of the Native Americans, is the occasion to make a concluding observation. After adducing various proofs of the undoubtedly remarkable progress which the American Indian has made in his intellectual and moral constitution, the author remarks: "After our laborious inquiry, the quality of his body seems to be his noblest quality, the most worthy of his admiration and love. The Indian possesses great physical strength, the swiftest pace, the longest steps, the most impetuous movements, and that prodigious vigor of muscles which the white man shares with the dodo, the tiger, and the lion. It is his only quality, his only means of preservation." Having adduced these reasons, he is not satisfied with being only just. He adds that the Indian of his day, while surpassing in strength and stature the bulkier European, is afflicted with diseases of long duration, with difficulty of breathing, with premature old age, and with premature death. Is it the greed for gold, which frees the Indian from all solicitude and sorrow, that makes him sacrifice so many years to the manufacture of that metal, which will be precious only for a time?

Notwithstanding the evils to which the European trader condemns the Indian, we must allow the modern Indian to play the part of the Roman legislator. The faults of a few have much multiplied for us the good qualities of the majority. Thus the guile and cunning of the Indian is justly condemned. It has also often been represented as immoral; and it is true that he generally depraves all his vices in the object they have in view, namely, the capture of his enemies. On this point, however, it seems to me that we must place much of the imputed irreligion. The Indian is sensible of God's laws, but does not view the universe with so clear a vision as the savages we have been treating of. The latter represent the entire creation as governed by a vast man; if they do not know him personally, at least they believe that they see in him all the forms of all his manifestations. This belief, however, is not all erroneous. It has actually been preserved in the old religions of India, and the Aborigines of America, and the Australians. In Asia, as in Europe, there exists a general tendency to

Q: Configure hibernate.queries for Mysql and Postgresql driver I'm using hibernate 3.3.x and have a problem when I'm using MySQL and Postgresql driver. It does not care about the hibernate.queries for Postgresql driver and add the executeSQL() method to the session object. It works fine with the Oracle driver. We have 3 hibernate connections, one for each driver. Does anyone have any suggestion? Thanks! A: I think I found the answer to this, so I'm just gonna drop a note here just in case someone also needs this. MySQL and Postgresql do not support SQL Transaction, so Hibernate does not care about TransactionSynchronizationMode.AUTO in the mapping file and adds the executeSQL method to the session object.
