Remote Control PC Crack Download For Windows

Remote Control PC Cracked Accounts is an easy to use and reliable application that can provide you with remote access to a computer over a Local Area Connection or even the Internet, allowing you to control its actions. In order to use the program, you simply need two computers connected to each other, where Remote Control PC Download With Full Crack was previously installed, acting respectively as a host and a client. The application offers two distinct connection modes. As such, in order to remotely control the target computer, you can connect directly, through the IP address or DNS name, you can also use an account connection, with an account and a nickname, thus bypassing firewalls, routers or other impediments. Following the connection to the target PC, you will be able to view its desktop in real-time and control it using your mouse and computer keyboard. In addition, the program enables you to perform various file transfers from one computer to the other, as well as copy and paste text and graphics between PCs. Moreover, you can use Remote Control PC to remotely shutdown or restart the machine you are connected to. An important feature of this application consists of its security standards, achieved through several technologies. Firstly, it relies on secure authentication using the CHAP algorithm and encoded traffic through the RC4 algorithm with a 128 random key for encrypting any transferred data. Secondly, the double passwords required to connect to a computer makes it almost impossible to access your host PC by people other than you. Thirdly, no private information is stored on any servers. Finally, by not opening ports in the firewall, no back doors are created into a computer's security. Remote Control PC is a user-friendly tool that you can use with confidence in order to remotely connect to other computers, providing you with many control functions while also ensuring both PCs' protection. Remote Control PC Download: Remote Control PC Key Features:

- * User-friendly interface and intuitive use
- * No need to install anything, or even open ports in the firewall
- * Ability to remotely control the desktop, mouse and keyboard actions
- * Remotely shutdown or restart the machine you are connected to
- * Ability to copy and paste any graphic/text between the two computers
- * Works with many computers and devices
- * No private information is stored in any servers
- * Possibility of connection through local area network
- * Two computers are required
- * Encrypted traffic through RC4 128 random key
- * Encrypted traffic using CHAP 3-
