#### What's New in the NfsStormLake?

nfsStormLake is an animated nature inspired screensaver that features a lake, and stormy weather. You can now enjoy this interesting screensaver any time you want or when your computer monitor goes idle. Have you ever wanted to be on the water, perhaps cruising on the ocean in a small yacht? Well, for those of you who love the water, let me present you with nfsStormLake. You will find yourself living the

---

dream, and experiencing the beauty of the oceans as it comes together with the environment, in this very special screensaver. The idea behind this screensaver is to capture every bit of information, and significance about the ocean that has come about over time. The average user will enjoy nfsStormLake, as they can easily change what they want displayed, and see the results. A full view of the whole water cycle can be enjoyed here. It is a demonstration of the rain, storm, wind, waves, and even birds and fish. It is nice that the basic features that you would expect in an ordinary screensaver are also

---

available in this one. The Ocean Cycle that you can see in the image above has these features available: the tide, and the water cycle. You can see the tide rising, and the level of the water changing. You can also see the different kinds of ocean elements, such as sun and sea as it appears through the screen. In addition to all of this, you will find the storms of the ocean, the wind blowing, and birds flying, all on the ocean. There are even different waves that can be seen as you scroll through the cycle. The whole thing is a demonstration of the amazing nature of the ocean. All of the

---

fish are realistic and can be moved around. You can see the stars in the sky as the sun goes down, and the water is all illuminated by the moon. You will also see the moon come closer to the sun and closer to the horizon. NfsStormLake is a screensaver that is unique in that all of the components of the ocean are related, as you scroll through the ocean. There is no other screensaver that has this type of integration, as there is no other screensaver that can do a whole ocean at once. It's long been rumored that the next-generation Xbox will include Kinect-powered voice commands, and it

---

seems to be happening: An online source has just leaked details on Kinect 2.0, including its new integrated microphone array and voice commands, of which “Xbox,” “Xbox On,” “Xbox On,” “Xbox On,” and “Xbox On” sound quite familiar to us. Microsoft plans to announce new Kinect hardware at E3, which is scheduled for June 15-18. We don’t have any details yet on the device, but expect to hear more from Microsoft at
