following sections, we will  
discuss the various software  
components that make up  
the AutoCAD application,  
starting with AutoCAD's  
main user interface (UI) and  
finishing with a discussion  
of the drawing process. Main  
window The AutoCAD main  
window has the name  
AutoCAD on the title bar,

and is the starting point for all AutoCAD programs. In this example, we start AutoCAD in “Drafting Mode”, but you can start in “Creation”, “Production”, “Map”, or “Verification” mode. The main window is divided into 4 panels: 1. The AutoCAD ribbon menu The AutoCAD ribbon menu (“Ribbon”) contains the AutoCAD menus and commands (“softkeys”), as well as those that are set

Mobile AutoCAD is available for the iPhone, iPad and Android mobile devices. AutoCAD LT for AutoCAD LT for iOS and Android was released on February 26, 2019. History The AutoCAD system was initially developed to help users perform tasks for the AutoCAD product. The design for the development of AutoCAD began in 1974 when it was first

---

conceptualized as part of the Unisys Dynamic Modeling System. Originally a version of the program was developed in the German-language market for the IBM PS/2 Model 75, first under the name Umformwertungs-Modellsystem (UMRS), and later, as AutoCAD. The German company which managed to get the German rights to the product was Unisys who also produced the product, but didn't have

---

the rights to sell it in France. In order to be able to sell it in France, the French company, SGS (Société Générale des Scénières), was licensed to produce it. It was the first product that was known by the Unisys name (UMS: Unisys Modellsystem). The first version of AutoCAD was used for the first time in December 1981. In 1982 the name of the program was changed to Unisys CAD

---

(Automatic Drafting Computer) and it was first used in France. The name was changed again in the early 1990s, to AutoCAD, to fit the market that Unisys decided to target for it (known in Europe as CAD/CAM). Version history Languages AutoCAD is available for 32-bit English, German, French, Dutch, Spanish, Italian, Japanese, Chinese, Czech, Norwegian, Danish, Russian,
