Browser Cache Information (2022)

Browser Cache Information, a small-sized and simple-to-use software application, is an auto-detection tool that analyses browser data and enables you to investigate it. It doesn't require installation and offers support for many browsers: Amaya, Beonex, ChromePlus, Chromium, Firebird, Flock, Google Chrome, Internet Explorer, K-Meleon, Lolifox, Lunascape, Mozilla, Netscape, Opera, PaleMoon, Postbox, Sleipnir, Songbird, Thunderbird, and Wyzo. Evaluation and conclusion: Simple interface and easy navigation allows for quick access to browser-related information, and options like cleaning and profiling are easy to apply. These days Browser Cache Information is being developed by PFCore Software, and it's still new. So, it offers basic and easy-to-handle options, and the provided free trial is a good way to try it out. Sorting software A simple way to sort any data (text, numbers, dates, etc.) automatically. Just enter a simple criterion, select sorting conditions and then choose the required order. Sortim's features

- Auto-detects sorting conditions and sorts data based on them;
- Allows you to sort numbers based on numeric ranges and date/time ranges;
- Provides much more information about sorted files in order to be able to comprehend the results and choose the right order for them;
- Supports the following criteria: numerical values, date/time ranges, the data type;
- Allows you to sort files by type, size, file name, file creator name, file mod date/time, etag and more;
- Provides a plenty of useful options for sorting: sorting by name, creation date/time, contents, size, properties, file name, creator name, etag, permission.

Sortim on Wikipedia Sortim is a tool for sorting any type of data (text, numbers, dates, etc.). It's a little gem, perfect for any everyday use. Just enter a simple criterion, select sorting conditions and then choose the required order. Sortim is a program for sorting data automatically, like a table or a list. Sorting data automatically is easier than manually. Suppose you have a list or table of data, such as a list of contacts, the results of a survey or the results of a tournament, you can sort this data automatically. It's a simple way

What's New In?

Display all data from multiple browsers and select the ones you want displayed. Browse URLs, cookies, history, bookmark info, start page location, and more! Comments Publisher: Ecco-Software File Size: 301 KB Chrome: Browser Cache Info, Manual Download Chrome: Browser Cache Info, Manual This program enables you to visualize, analyze, and erase browser cache, cookies, history, start pages, and bookmarks. It also lets you save links to selected pages and open any URL you need in your browser. Use Browser Cache Info to: View and see the amount of disk space used, as well as the kinds of data saved in your browsers. Select which types of browser data you want to display, as well as which information you want to be erased. Manage data: view details for every type of data and identify those that have been altered. Save sites as bookmarks, or manage your bookmarks by selecting a location or name. Paste any URL in the address bar and open it in your browser. Undertake any other actions you want to take. Browser Cache Info is a small and simple-to-use application that helps users view and erase browser data such as cookies, history, cache, and start pages, as well as manage and alter bookmarks. It's light on memory and has no installation requirements. You can use it on any computer and it won't produce annoying Windows error messages or introduce additional items into your PC's registry. Browser Cache Info also has an intuitive interface that's easy to use for all kinds of users. You can view and delete information from multiple browsers, as well as specify which types of data you want to see or erase. You can also choose to view details for every type of data that's stored or identify and view those you want to be erased. If you need to open a URL in your browser, you can paste it into the address bar and just click the program's icon to launch the software utility on your computer. When viewing data you can: Browse start pages with their locations, file size and name. Open URLs. Save links to selected pages. Bookmark these sites for future use. Find out how many pages you visited or what was the last page you were on. Evaluation and conclusion No error dialogs were shown in our tests, and the software

utility
