"With a warm and heartfelt story, a large world with its new and original setting, full of charm, and challenging action, Ragnarok Online has quickly become a cult classic. With improved graphics, customizable battles, and a new interface for its players, the game only gets better." GameSpot("One of the greatest success stories in Japanese games is the game Ragnarok Online, which is being revived in PC for the first time in five years. In addition to offering a host of improvements like the addition of brand new spells and features, the game has also introduced the new concept of a "scroll war". It's up to you to choose which of the opposing factions to join. With two factions, and the addition of five new classes, you'll have plenty of decision-making to do when choosing the one that suits your play style." Phyrion Virus("At first glance, Ragnarok Online 2 looks very much like a typical MMORPG [massively multiplayer online role-playing game] released in 2006. However, the game is the first to use so-called "scroll war". This means that players can create an avatar through which they communicate through both text and voice. In addition to standing armies, there are also "scroll parties" whose role it is to subdue the opposing party in the battle. The characters are also made up of a maximum of 20, which is significantly more than in other existing MMORPGs. Add in the flashy graphics and the fun elements, and Ragnarok Online 2 is a promising newcomer. The main weakness is the control, which is somewhat clunky, but this is surely not the fault of the game itself."
