FIFA 22 introduces “HyperMotion Technology,” which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay. New Teammate AI - Teammate AI retains its foundation in the Real Life intelligence as the player’s real-life attributes are at play during interaction with the AI. During gameplay, the AI will use teammate physics, stamina, intelligence, personality traits, the fundamentals of the game and opposition actions (shot speed/precision/accuracy) to make realistic decisions. The AI Coach influences player behavior by offering a fast pass, hiding, dumb taunt, or giving a call to action during on-ball and off-ball situations. - Teammate AI retains its foundation in the Real Life intelligence as the player’s real-life attributes are at play during interaction with the AI. New Goalkeeper Conditioning Engine - The FIFA 2k Goalkeeper AI Conditioning Engine has been enhanced in FIFA 22.

Features Key:

- NEW “Arcade-inspired” FUT Mode: 12 new FUT modes for career and multiplayer, consisting of high-octane games that can be played when you have 30 minutes to spare, and more if you have 60 minutes.
- Deeper, more intelligent AI than ever before. AI has been improved using a learning system to unlock complex behaviours and better mimic real-life players. Players adjust their moves based

on factors, not just how good they are: learn new behaviours, don't follow the general trend, and be unpredictable. The timing and intensity of ball and player movement have been improved, and they react to each other more realistically. Player movements are more nuanced, intelligent, and responsive. Players will change their running style based on the situation, having greater awareness.

- **POWER-UPS:** Attacking players get a burst of speed, stamina, acceleration, and more. Defensive players keep the ball carrier under pressure with a burst of strength and take the ball with more power. These player enhancements give your performances more punch. Players can gain a boost to their favourite skills, and those skills then permanently improve once the player reaches a certain level. Every player gets a series of attributes to decide which power-ups will be activated as they reach new achievement levels.
- **DYNAMIC ANIMATIONS:** Players have an improved animation system that looks cool, flows smoothly, and reacts to the ball, and postures and facial expressions mean reactions are more expressive. Completely revamped dribble moves and tackle animations give us something completely new and better for in-game gameplay. Every player now has a special open animations sequence when performing those moves to further highlight their unique style.
- **NEW BREAKS:** In career mode, situations occur that might lead to free kicks, corners, and open rebounds. When ball touches the ground, every player moves as if with a controlled jump.
- **NEW COMPLETE DAMAGING SYSTEM:** Passes, shots, and tackles hit with force. They are now stronger, crueller, and much more dangerous.
- **NEW TEAMWORK:** Reactions between players change depending on the way their roles are assigned to communicate to teammates, adding to the reactive feel of the game.
