“Everything in Fifa 22 Activation Code is interactive. The ball, your players, tactics, sets, space on the pitch – everything is interactive. The addition of HyperMotion Technology brings that to the next level,” said David Rutter, Game Director of FIFA. “We are the world leaders in creating and developing interactive environments, and we’re proud to bring that fully into the game. We’ve spent a lot of time with teams like Arsenal and our own scientists and engineers here at Visual Sciences to ensure we have the best interactive, authentic and realistic gameplay.”

Match Engine The core of FIFA 22’s technology enhancements is the new, entirely integrated Match Engine. It animates individual players, tracks them as they run around and perform actions, then makes them visible on the pitch. On-screen, players can instantly detect friend or foe, with and without the ball, using their Super Game Intelligence (S.G.I.) AI functions. FIFA 22 also introduces the Star Ratings System, which is designed to build on the success of the FIFA 17 Team of the Year series. Players earn and lose stars for their performances at the match, and they can quickly see who’s excelling. What’s more, they can decide to retain those stars at the end of their match, to reward a player’s outstanding individual performance.

Star Ratings System The advanced new Generation Toolset empowers FIFA 22 players with the ability to save, reset, recall and share individual game setups. Players can save setups for up to 12 games, and as players gain experience, they can unlock the ability to re-save setups for nine games. This gives players the opportunity to return to a game setup at a later time and instantly experience gameplay that is more difficult, with harder and more attacking/defending tactics available in the system setup. One of the many benefits of this system is the ability to save setups specifically for the player’s position of choice. For example, a goalkeeper could save setups for a quick passing or full-backs setup, or a typical striker setup. When players return to that setup, it can be a quick and easy way to experience what it’s like to be that player. The Generation Toolset is available for players who want to experience the best possible FIFA 22 gameplay experience from a user-generated perspective. Players can use the Generation Toolset on both FIFA
