In addition, the game introduces the new One Touch Control and contextual retouching systems, which together allow for precise control of the ball. “Our goal is to offer gameplay that is more difficult, more realistic, more varied, and more exciting than FIFA ever has,” said Jeff Withey, senior producer, FIFA. “Our new physics engine pushes the boundaries of what’s possible. We’re delivering the most authentic, immersive and fun football experience possible. It’s our most technically advanced game to date, and our most ambitious to date.” “With this in mind, we then put a team together to find out how we could accomplish these goals,” said Withey. “We wanted to make the deepest, most immersive, and most authentic football experience possible. We knew that for this to be possible, we needed to build a new physics engine, a new sports motion-capture system and, as part of the engine, a new all-new user experience.” The new physics engine builds on FIFA 17’s new Impact Engine, which added new awareness, collisions and trajectory-based gameplay, as well as tackling and goalkeeper skills. The engine also added new physics models such as fuller physics for the pitch, changing surfaces, and tackling. It is built on an established base engine, fully customizable by the developer. The new sports motion-capture system is a high-volume, high-speed system that is optimized for “sport.” The key features of this new multi-camera capture system includes: \* Multi-tiered cameras: up to 20 cameras on each tier, each with a different focus area \* Multi-tiered transmitter arrangement: the top cameras on the headgear will focus on the central player, while the bottom cameras on the back will be focused on the opposition players. All cameras and transmitters on the body and headgear are controlled by the engineer, who makes all adjustments and calibrations. Once calibrated, all cameras will automatically re-calibrate to match the position of the body and headgear \* New hardware components: many parts of the new capture system are specifically designed to deliver the data speed and reliability required for extreme sports such as football The camera team has over 10 years of experience capturing live sports. They work with stadiums and with teams, trainers, and the headgear manufacturers to ensure the

Sponsored by EA FIFA is a series of association football video games by EA Sports. It was launched on 20 September 1992, at a trade show in Cologne, Germany. The debut version of the game was released on the Commodore Amiga, Sega Mega Drive/Genesis and IBM PC DOS platforms. A PlayStation version was released in 1994, followed by a PC version in 1997, a Game Boy version in 1998, and later versions for Nintendo 64, Sega Dreamcast, PlayStation 2 and PlayStation Portable consoles. To go with the new FIFA version, there will be a new kind of Soccer, which is not against Soccer (football), but Football. The New Football is an action packed game in which the players put the ball in the goal using different techniques. Since I am one of those people who is always looking for the new Football styles, I am here to introduce you the new Football style that will be in the FIFA 22. This mode is called FUT. What is FUT? FUT in FIFA is a new way for players to enjoy soccer gameplay. FUT will allow players to go online, compete against players from around the world, play with friends or build a dream team of real players in their favourite clubs. To start a FUT game, or join a game, you will need to create a FIFA Ultimate Team Account. All you need is an EA Sports FIFA Ultimate Team Account to play the game. Besides the FIFA Account, you need to create a FUT account as well. Why I chose MLS as my first FUT campaign? Well, let me start off with my story. When I started playing the game, I was playing in FIFA 18. And I haven't seen a soccer game that I can go online and play as my favourite team in FIFA 21 and 23. FIFA 21 never gave me the opportunity to play as my beloved Liverpool FC. And FIFA 23 has really proven that EA is dead serious with their new Football mode. They even added a mode called Leagues and closed leagues. It seems that the Fut team is really going all out to make sure that you find a kind of football that you love. FUT in FIFA 22 is built on a simple premise. You can construct a winning team of real players on your favourite clubs or test your wits against other teams in the FUT Draft. Players from 24 competing professional leagues will be available in F
