---

Code - an excellent tool for photo editing and colorizing. Photo-Colorizer is an easy and simple tool for modifying color images, which allows you to change their color palette in an intuitive and easy manner. Photo-Colorizer works well on any computer that supports Java. Graphics processing is done using the GTK+ toolkit, and the application also supports downloadable skin collections. Thus, you can use skins from the default package or from the internet. Photo-Colorizer is an application which comes with a well-designed interface, smooth animation, a large palette of colors to

---

choose from, an eraser, and a fill with clear mode, and a few useful tools for image editing and enhancement. Photo-Colorizer comes with support for an assortment of images in a variety of formats, including BMP, GIF, TGA, TIF, PNG and JPEG. The program also comes with support for Windows Media Video, with the Adobe Flash plug-in. All of the file formats supported by Photo-Colorizer are represented in the form of thumbnails. Unfortunately, there are no options to decrease the size of the images in the preview window, and the speed is slower than with other similar

---

applications. Photo-Colorizer is an easy-to-use tool which enables you to add colors to your monochrome pictures. You can use the mouse cursor or the 'drag and drop' method to load images. Photo-Colorizer supports a wide variety of image formats, and you can edit the image, colorize and balance its color, as well as zoom in and out. Image colorization can be done quickly and with ease using Photo-Colorizer. It supports a tool for colorizing individual pixels, a fill with clear mode, two modes for getting the image ready for editing, an eraser, and several color palettes. The

---

application has a reasonable speed and doesn't leave a mark on your computer's resources. Unfortunately, it would be great if the interface was updated and supported more file formats, in addition to the few available. Photo-Colorizer's interface has a classic, well-designed design that contains a standard window with an intuitive layout. The

pop up error dialogs during our tests; we have not experienced any problems. However, additional improvements are welcomed in the interface and features department. Photo-Colorizer has not been updated for a long time. In the current work environment, working time is the most time-consuming part of the day. In order to optimize, you need to get rid of all the unnecessary processes, to reduce the consumption of unnecessary bandwidth, and to develop efficient tools for work. You should take into account the most popular ways for effective analysis and visualization of the data that
