. Moreover, it comes with good protection against the SYN flood attack and other various network attacks. Additionally, the DDoS Firewall allows for point-and-click control of most network attacks by using advanced rules. After downloading the DDoS shield for Windows, the user must install it on the computer before it is useful. It does not require any additional software to operate and it is ready to be used immediately after installing it. The main features of this antivirus include: Smart Scanning â It automatically scans all the files, emails,

---

files, and folders as well as their attachments. Fast scanning speeds

It enables the user to scan the files, emails, and folders in a speedy manner. Advanced Antivirus It protects the user against known as well as unknown viruses and trojans. Heuristic scanner The heuristic scan engine detects the new viruses as they emerge. Real-time protection It protects the PC from known as well as unknown malware attacks. DDoS Firewall It helps the user to block malicious and nuisance traffic. This provides 24-hour powerful protection.
