Photoshop shows you the range of values for an image when the eyedropper tool is selected. You can select one or more areas on an image and learn their values. Press the key and the eyedropper tool selects the areas you want to measure. Photoshop shows the range of values under the eyedropper. The values are the darkest and lightest values of the selected image. A calligraphic brush is a type of brush that produces an artistically formed line instead of a uniform stroke. It is created with userdefined settings. The pencil is used for quick sketching, for drawing inspiration or for quick retouching. The brush settings you choose for the pencil will influence the stroke and pressure you select. The lines you make are only visible for a short time so don't waste your time by creating a messy line. The pen tool lets you create freeform lines by moving the brush selection over the image. The Gradient tool lets you make gradient fills. You can select multiple areas and adjust the colors as needed. The Dodge and Burn tools lets you selectively lighten or darken the colors of an image. The Dodge tool lightens the area and the Burn tool darkens it. The Move tool lets you drag an image to a different location. You can use the Eraser tool to remove pixels from an image. These filters add different effects to your images. You can use the Magic Wand tool to select an image and all the pixels inside it that have similar properties. You can select areas of an image and use the Lasso tool to make selections. This lets you select a range of pixels. You can modify the size and the shape of the selection with settings. You can use the Pen tool to draw a selection around a part of an image. You can draw and edit selections with the Move tool. You can use the Blur tool to blur the image. The Sharpen tool focuses the image, bringing out details and edges. You can use the Sponge tool to add edge contrast to an image. You can use the Smudge tool to blur an area. The Clone tool copies pixels from one area of an image and inserts it into another area of the same image. You can use the Spot Healing Brush to select a damaged area of an image and fix it. The Eraser tool lets you remove pixels from an image. You can erase pixels with the Healing Brush tool
