The next time you are faced with a decision about whether to use a program that costs \$50 or a free, five-year-old Open Source editor, remember that one often has the capability to do far more than the other. To see an example of what you can do with Photoshop, have a look at the featured image shown in Figure 3-1. When I first began editing images I resisted using Photoshop and stuck to free, open source editors, such as Pixelmator, GIMP, or Fotoxx. I even added those programs to my iMovie project to cut titles, descriptions, and other effects during the editing process. Because a layer-based editing system is used in Photoshop, you have complete control over the layers. You can combine them with transparency, hide them, and move them all around. You can also open a background layer and trace the edges of images, objects, and other images to create a title or border that you can then replace with another image. You can even use this technique to create a composite image that combines a group of layers into a single image. Photoshop can be purchased by both individuals and businesses. It comes as a stand-alone program, or as part of a bundle that includes other Adobe products such as Photoshop Elements, InDesign, and Dreamweaver. The professional version of Photoshop is often referred to as Photoshop CS6 or Photoshop CS6 Extended. Photoshop Extended adds many new features, such as 3D effects, tools, and more layers, but it also cost more than the standard Photoshop. Photoshop Express, formerly known as Photoshop CS5, is a free version of Photoshop that makes full use of the Photoshop layers and comes complete with the tools needed to edit images. It is available for Mac and Windows. \*\*Figure 3-1:\*\* My favorite feature in Photoshop is the ability to create images with multiple layers. Photoshop maintains a terrific resource called Photoshop Users (www.photoshop.com/tools/photoshop\_users). In the Resources panel, you can click File and then Resources. Photoshop Users is a collection of tutorials covering all aspects of the editing process, including creating layers, color gradients, text, workflows, and much more. Photoshop CS6 continues to deliver a great editor that comes with a price tag of \$900. The following sections describe some of the features found in the professional edition of Photoshop. Taking advantage of the Quick Selection tool

But I guess most would agree that we're not in those positions that we think, right? I mean, if it was always up till the last second I think we would feel differently. But if it's not, in terms of like any games you know we've made regular decisions throughout the rest of the playoffs. I mean we're hopeful that can be a permanent position moving forward and I think that's always been the last couple of years and moving forward and. So we'll see how that plays out but I don't think it will change our coaching. Sure there are a lot of coordinators who are good coordinators but I mean and and I think that that's that's why I mean I'm looking at that, you know. I just don't think the stuff that you're talking about has anything to do with the way we coach it. Yeah. Yeah. Yeah. Yeah. And and and there's there's no question, I mean, you know, again, like any other sport's similar. You know. You're talking about a year of preparation. You've got a year of preparation to to conduct an investigation to to make sure that the players that you're about to, you know, they do. And there's always a learning curve. And and I don't think it's unfair to say it again. I think we've gotten better over the years and I think we've done a pretty good job. You know, we've had, you know, a year to go out and study. And and yeah, I mean there's things, you know, you know, we spend the first part of the year trying to get better, but the end of the year, you know, trying to figure out the things that we might have missed last year and we're we're trying to come up with better games and make better decisions and It's it's a long process. It's a process that you have to go through and I think it's been a long, long process for a lot of different coaches including us. You know, I don't know where you're getting your information from. We've had a lot of success and we continue to do that. I think that's what. I think one thing that's really interesting to me is I've been a part of, you know, even the last four years.
